Empowering Entrepreneurs To Create

Internet Marketing Basics with Alecia Stringer,
2ASuccessDreamBlog.com
Empowering You to Create Your Success Dream

This book should be more of a resource than an action plan. You will need to create your own action plan from all the suggested resources recommended here for you.

Contents:

1. Mindset is everything and should come first. Have a mission, why, and vision of your business and goals.
2. Business Setup: Insights on system and funnel overview process
3. Setup List - Automatic Email and brand marketing
4. Blog customization Basics - Why and resources to start and set one up
5. Facebook: Groups, Fan Page, Profile connections
6. Video Branding, Marketing, SEO Basics and Paid Strategies for Traffic
7. Search Engine Marketing Resources
8. Social Media Marketing Resources

Best practices to use this guide:

This e-book is an accumulation and experience shared in blogs, videos, and training I have shared. Mainly resources you can reference as you learn and add new marketing training experiences. Do not purchase or go through all the training. Pick a section and master before learning a new strategy. The boot camp will help guide you in that process.

You can see more of Alecia Stringer's story here:

[My Story: All About Alecia](http://www.2asuccessdreamblog.com/my-story-all-about-alecia/)

<http://www.2asuccessdreamblog.com/my-story-all-about-alecia/>

This is for the very beginner, yet one that has experience can still pick up new ideas and strategies that can be applied.

The purpose of creating this resource is also to have a resource for the very beginner to sell and share their resources as well. As the owner of this e-book, you may change out your affiliate links and sell this guide as a recommended guide for your team and others you share this information to. Do not give this e-book away for free as it has a wealth of information and years of experience of resources that you can apply. Use the same concept as you would not get your college degree for free. Would you really earn it, if there was not some profit or something for exchange? As a suggestion, I would not go below \$7. So re-sell this guide as high as you begin to build your team. Many start small for \$25 to \$97 and increase after so many purchase it. So for example, for the first 30 people, they can get this resource for \$25, then it goes up to \$97 or how ever high you want to reproduce the training.

When you go up in price, I would also add a donation to charities or personal coaching with the guide.

These are all suggestions, and you will need to refer back to the website and email you personally get from me to know what offer stands.

Take your business seriously, and people will take your offers more seriously as well. In turn, make irresistible offers!

1. Mindset is everything and should come first. Have a mission, why, and vision of your business and goals.

Recommended that you read from these 5 book suggestions that you can pick up from you local bookstore or amazon.com as it will give you massive tons of ideas. The links go to my publisher site, as I will get percentage of the sale. You can create your own account for free as well, when you reproduce this ebook as well.

2. Business Setup: Insights on system and funnel overview process

This 5 day boot camp will give you a very basic overview on how a business is set up. Each video is less than 30 minutes long and gives clear steps of why and the how to in setting up a basic business on the internet, no matter what type or niche business you want to create.

[Internet Lead Generation Boot Camp](#)
[3.0 Day 1 with Alecia Stringer | Alecia Stringer's Empower Network Blog](#)
<http://bit.ly/PfrFtF>

The tools I recommend is listed in the boot camp, but I will list them in here as well, so you can see a full outline.

1. Email auto-responder: <http://2asuccessdreamblog.com/aweber>
Aweber is what I recommend. I have experienced other systems and they do not integrate with other website as easy as Aweber does.

Others names are: MailChimp, icontact, GVO, GetResponse are all among other popular resources.

Looking at long term business, you want to make sure you can keep the email in one place, and not move them around from system to system. Keep your business constant. You will gain more trust in your followers and customers that way.

2. Blog and Capture Page: Every business needs a blog to keep fans, customers, and prospects updated on new information.

This is a learning curve that everyone goes through when learning the best way to set up one up for your needs. No matter what business you have, I recommend you have an Empower Network blog in additional to your main blog or website.

Alecia Stringer has personal contacts that I go to create a blog or website for your business. In fact, you can have one that has the same template/theme that will even include the plug-ins similar to mine at <http://2asuccessdreamblog.com> If you like to do this option, contact me by Skype at: alecia.stringer and we'll get that done for you.

I do not suggesting you use a free site like wordpress.com or blogger.com because you do not have control of that content. Your hard work could be all gone one day with out your control. Only use this in additional to your original site to create more backlinks to your main site.

When you create your own blogs using the wordpress.org platform, you will need to get a domain and hosting. These are the services I recommend GoDaddy and Hostgator
<http://2asuccessdreamblog.com/godaddy>

<http://2asuccessdreamblog.com/hostgator>

These are posts with my experience to Marketing Training and systems to know the latest trends and strategies.

Out of many marketing systems, these two work together:

Empower Network - Blog and Marketing Training
<http://2asuccess.com>

One of the advantages of Empower Network, is that you do not have to do any plug-ins or capture pages, as they are all ready for you. If you want to do specific customization, I suggest you use MLSP's tool. The lay out is simple to customize and be ready. The other tools forces you to do additional steps that MLSP has eliminated.

The other tools and strategies are how to use more effective marketing. All are optional, but know the basics of creating a list of prospects or customers, and what valuable site you want to create to get them there. These are affiliate programs and the tools you need online.

3. Setup List - Optimize Email and brand marketing

Emails should be personal, and drives exactly what the problem is for the customer or prospect.

I recommend you read these blogs I wrote to get you an idea of how you want to focus your brand and email marketing. There are many great books out that can help you in this process as well. This is one type of marketing that you will always learn and grow. When you use marketing systems like MLSP or Empower Network, there are emails that you can use that are ready for you. What makes your business stand out is how you customize it. Customize it to your brand, and who you are. That is how you should direct all your prospects and customers to share a little story of how to take them to the next step within your business.

There are many ways to use Facebook to convert sales for your business. The best training I have seen is in MLSP with Michelle Pescosolido and Amy Porterfield. They give you many different directions and ideas to use free viral methods along with paid. The blog posts I share are several ideas on how to use Facebook along with tools to help make the process much easier, so you are not on the social network all day. That's the overall goal in an internet business is to set up a way to create residual traffic.
